5C-MD LC-5C-MD

PUMP CONSTRUCTION & SERVICING:

March "Orbital" Magnetic Drive Pumps eliminate the conventional shaft seals found in most pumps. Hence, there is no rotating seal to wear and allow the liquid being pumped to leak out. The pumping action may eventually fail, however the liquid can never leak out. The Model LC-5C-MD pump can be run totally submerged or can be run in open air for complete moisture protection. The model 5C-MD must be run submerged only. All pumps can be serviced with the use of a screwdriver. The only moving part other than the motor, is the Impeller Assembly, which rotates on a stationary shaft and up against a thrust washer. These are the only parts that can wear, and may need to be replaced. See the Repair Parts List for replacement parts.

If you remove the Pump Housing or if you remove the cover, make sure the Motor Bracket "O" Ring is properly seated in the groove before tightening the Housing Screws.

5C-MD SUBMERSIBLE ONLY

OPERATION:

Pumps are not self priming and will not produce a suction lift and must be installed with a positive flooded suction. March relies on the liquid being pumped to lubricate the Impeller Assembly spinning on the stationary shaft. The pump is not to run dry as the plastic may "freeze" onto the shaft. Teflon Filled, and Carbon bushings are available if needed. Contact the factory for special applications.

ELECTRICAL:

Models are 115 Volt or 230 Volt, 50/60 Hz, 1 phase, A.C. The motors are thermal overload protected, and the motor and overload combinations are U.L. and C.S.A. listed. All cord sets are U.L. approved 18/3 wire, SJO or SJT cords.

NOTES:

All specifications & data are based on pumping water and are intended for use as a guideline only. Ratings may vary depending on the current motor being used.

NOTE: Contact Factory for other materials and/or parts not listed.

Legend: S = Standard, O = Optional

MATERIALS IN CONTACT WITH SOLUTION:

5C-MD: Polypropylene, Buna N, Ceramic, Ceramic Magnet, Noryl, Stainless Steel, Epoxy, and Cord.
LC-5C-MD wet end: Polypropylene, Buna N, Ceramic, Ceramic Magnet, and Stainless Steel.

LIMITED WARRANTY:

March pumps are guaranteed only against defects in workmanship or materials for a period of one year from date of manufacture pumping water. On all other solutions, contact the factory for application assistance. March Pump Application Worksheet 0750-0130-1000 is available for additional warranty information.
